CAREER OBJECTIVE

MCA graduate (2026) with hands-on experience as a software intern building React and Python-based web applications for real clients. Comfortable across the stack — from frontend UI to database design — and looking for an entry-level full-stack / web developer role where I can keep building production-quality software.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React (React 18), Tailwind CSS
Backend	Python
Database	MySQL
Tools & Platforms	VS Code, GitHub, Razorpay, Google OAuth, Antigravity
Software	Word, Excel, PowerPoint

EXPERIENCE

Software Intern | *QMEX Solutions (Digital Marketing Company)* **Present**

- Contributing as a frontend/full-stack developer on client and internal web projects, working across React and Python.
- Picked up working knowledge of digital marketing practices alongside development work, including how technical builds tie into marketing and content goals.
- Built and continue to maintain the QMEX Learning Hub, a React-based e-learning platform (see Projects).

PROJECTS

Apparel Design & Order Management System — *HTML, CSS, JavaScript, Python, MySQL*

- Built a web application for customers to book tailoring services, upload custom designs, and track order status in real time.
- Developed frontend pages, connected and structured the MySQL database, and built the admin dashboard for order management.

QMEX Learning Hub — *React, JavaScript, Firebase, Supabase, HTML, CSS* | learninghub.qmex.org

- Collaborated in a 3-member team to build and maintain a React-based e-learning platform for QMEX Solutions, leveraging Firebase and Supabase for backend services and data management.
- Refactored the app's navigation system, migrating state-only pages to real URL-based routes and extracting a reusable SiteNav component.
- Contributed to a UI/UX redesign aimed at a cleaner, premium SaaS-style look and feel.

EDUCATION

MCA — *Bishop Appasamy College of Arts and Sciences* **2024 – 2026**

B.Com(CA) — *Bishop Appasamy College of Arts and Sciences* **2021 – 2024**
